Partner	Ministry of Internal Affairs in Armenia (MIA)
Overall Objective	To contribute to form the safest and most resilient country in the region, to ensure the safety of individual, community and society from the risk of disasters, to contribute to the risk-informed sustainable development take place and to form a safety culture
Component objectives	Strengthened disaster risk management and governance capability within MIA* that is gender-responsive, inclusive and sustainable
Component outcomes	Component 1: Strengthened capabilities within MIA to lead systematic, inclusive, sustainable and learning-oriented communication to enhance public awareness Component 2: Strengthened capabilities within MIA to lead systematic, inclusive, sustainable and learning oriented Training and Exercises for disaster risk management Component 3: Strengthened capabilities within MIA to work with the Union Civil Protection Mechanism (UCPM) to enhance harmonisation with EU practices
Cross-cutting issues (CCIs) **Monitoring, Evaluation & Learning (MEL)**	To safeguard effective and sustainable results with high quality MCF applies two main cross cutting perspectives in all international interventions and partnerships: human rights & gender, and environment & climate change. Both sets of cross-cutting issues will be operationalised in the project by taking the Ukrainian context and type of partners into account. Monitoring, evaluation and learning will be used strategically to inform project implementation with a focus on learning and achieving results. As such, monitoring will be used to follow up quality and performance, and evaluation will be used to assess project impact.
Strategic approach	• Legal and institutional frameworks • Early warning and early action for DRM • Volunteerism and public awareness • Inter-institutional coordination • Cross-cutting issues

Type of activities	• Training and exercises • Meetings, insights and support by component experts • Workshops, webinars, seminars and conferences • Study visits and exchanges
